

## Invitation

# Summer Industry Briefing Lunch

## What to expect

With keynote talks from our offensive and defensive security teams and a client, our Summer Industry Briefing presents an opportunity to gain insight into the latest threat landscape developments, how they could affect operational risk and innovative ways of identifying and overcoming these challenges.

This invitation-only event includes a complimentary lunch, refreshments, and networking with peers and the JUMPSEC team.

There is limited capacity, so please reserve your seat to avoid disappointment.

## What is happening on the day?

1.00 pm arrival, registration and lunch served

1.45 pm keynote talks commence

5.00 pm Networking drinks

## Where

The Swan at  
The Globe Theatre  
21 New Globe Walk,  
Bankside, London,  
SE1 9DT

## When

11th June 2024  
1pm - 5.30 pm

## Dress Code

Smart Casual

### Shifting perspectives in cyber security

Why evidence-based detections are critical to stopping attackers from achieving their actions and objectives earlier in the kill chain process.

### A red teamer's forecast - Cloudy with a chance of hacks

Our adversarial simulation team will outline how attackers exploit cloud infrastructure and offer strategies to counter their efforts. Key insights involve recognising significant security risks in cloud adoption, including emerging attack vectors, comprehending hacker tactics in cloud settings, and swiftly implementing effective measures to safeguard cloud environments.

### Sentin-hell: Can't afford to have everything in Sentinel?

Our Detection and Response team will provide you with strategies for lowering the barriers to entry and maximising your Sentinel licence.

### Inside Continuous Attack Surface Management

Learn how we navigate data complexities, filter crucial insights and only true positives to secure your digital footprint. Through real-world examples, bridge the gap between technical intricacies and managerial understanding, gaining clarity on the vital role CASM plays in cybersecurity.

### Developing a Partnership Approach

James Hamilton, Head of Cyber Security at Groupe Atlantic, shares how cyber security strategies have evolved through collaborative partnerships with common goals.

Our talks will help inform, shape, and build confidence in your future cyber security activities.
